

Rolling a 12-word seed — the method

This sheet explains how to use the BIP-39 word table on the pages after the worksheet, for a **12-word seed**. The full procedure, including what to do with the words once you have them, is at bitcoinkeys.guide/roll-your-own-seed — read it before you begin. Do not work from this sheet alone.

What you need

One six-sided die, one coin, pen and paper. No computer, no phone.

How many words you roll

11 words. Your seed is 12 words long, and you roll all but the last one. **You do not roll word 12.** It carries a checksum that has to be calculated, so there is no entry for it in the table and no way to reach it with a die — your hardware wallet works it out, and the procedure on the site explains how for each device.

For each of your 11 words

1. **Throw the die 5 times. Reroll every 5 and 6** — they do not count and are not written down. Keep throwing until you have 5 results that are each 1, 2, 3 or 4. This is why no entry in the BIP-39 word table contains a 5 or a 6.
2. **Flip the coin once.** H is heads, T is tails. The coin is not optional: the die gives ten of the eleven bits a word needs and the coin gives the eleventh. Always taking the same side halves the randomness of every word you pick.
3. **Find your word.** Blocks are headed by your first 3 throws. Find that block, then read down to the line matching your remaining 2 throws and your flip.
4. **Write the word down, in order, by hand.** Never type it, photograph it, or read it aloud in earshot of anything with a microphone.

Two things worth knowing

The BIP-39 word table holds no secret. It is the standard word list in a fixed order, and anyone can regenerate it. Printing it, photographing it or keeping it on a phone is harmless. Your *throws* and the *words* they produce are the secret, and those never touch a screen.

This is the same method and the same table BitBox publishes for its own devices. We generated ours independently from the word list and checked all 2,048 entries against theirs: every one matches. Either table gives the same word for the same throws — but use one table for a whole seed, not a mix.

Worksheet — 12-word seed

The moment you write on this sheet it becomes your seed. Treat it exactly as you would the words themselves: never photograph it, never type it up, never leave it out. When your words are safely on their permanent backup and you have restored from that backup successfully, destroy this sheet — shred or burn it. Do not simply bin it.

12	Not rolled — your device calculates this one			

This sheet is for a 12-word seed: you roll 11 words and your device supplies word 12, which carries the checksum. A 24-word seed has its own sheet — print only the one you are doing. Full procedure: bitcoinkeys.guide/roll-your-own-seed

Rolling a 24-word seed — the method

This sheet explains how to use the BIP-39 word table on the pages after the worksheet, for a **24-word seed**. The full procedure, including what to do with the words once you have them, is at bitcoinkeys.guide/roll-your-own-seed — read it before you begin. Do not work from this sheet alone.

What you need

One six-sided die, one coin, pen and paper. No computer, no phone.

How many words you roll

23 words. Your seed is 24 words long, and you roll all but the last one. **You do not roll word 24.** It carries a checksum that has to be calculated, so there is no entry for it in the table and no way to reach it with a die — your hardware wallet works it out, and the procedure on the site explains how for each device.

For each of your 23 words

1. **Throw the die 5 times. Reroll every 5 and 6** — they do not count and are not written down. Keep throwing until you have 5 results that are each 1, 2, 3 or 4. This is why no entry in the BIP-39 word table contains a 5 or a 6.
2. **Flip the coin once.** H is heads, T is tails. The coin is not optional: the die gives ten of the eleven bits a word needs and the coin gives the eleventh. Always taking the same side halves the randomness of every word you pick.
3. **Find your word.** Blocks are headed by your first 3 throws. Find that block, then read down to the line matching your remaining 2 throws and your flip.
4. **Write the word down, in order, by hand.** Never type it, photograph it, or read it aloud in earshot of anything with a microphone.
